COLD ICON

designed by
SIMONE MICHELI
ARCHITECT

I created for Vitrifrigo a brand new hotel minibar that combines cutting-edge performance to an iconic, fluid and essential design versatile enough to transform and seamlessly adapt to any space, reflecting the unique vision of every guest.

R600 Natural Gas

Relax

ICON REDEFINES THE CONCEPT OF THE MINIBAR.
Innovative design and smart integrated features: it takes a front-row seat in both style and functionality.

Easily remove the outer cover and paint it in the color that best expresses your style.

Cold Icon 33L

440 mm.

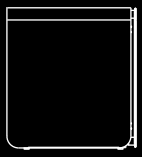

38 l. - 28 kg.

390 mm.

540 mm.

Cold Icon 42L

480 mm.

43 l. - 29 kg.

Power Supply: 220-240V 50Hz
Consumption: 0,200 KW/24h

Certifications: CE, EMC, LVD, CB

DIFFERENT OPERATING MODES AVAILABLE, TO MATCH ANY DEMAND

Standard mode: Cold Icon operates on a fix temperature setpoint, @ +4°C.

Eco mode: the compressor goes into standby mode, to allow the integrated cold energy storing system to keep beverages at the right temperature. This happens from 11:30PM to 5:30AM, allowing an overnight silent operation.

Sleep mode: the compressor goes into standby for one our, then returns to the previous setpoint.

Quick chill mode: the compressors runs continuously for 5 hours, to return to the previous setting at its end.
